

XNAT Project Sync (Xsync)

XSYNC plugin

XSYNC implemented as a XNAT 1.7 plugin.

Xsync plugin enables automatic synchronization of data from a project in one XNAT system to a project in a second system. Xsync is configurable to ensure that only the desired data is delivered, and if required, data is properly de-identified, and that it is delivered on a pre-set schedule.

Download / Documentation

All XSync Documentation is located in the code repository: <https://bitbucket.org/xnatdev/xsync>
