

# User Auth Service API

## Contents:

- [Authenticate A New User Session](#)

## Authenticate A New User Session

```
PUT - /data/services/auth
```

### Parameters

<b>username</b>	Required body parameter
<b>password</b>	Required body parameter
<b>provider</b>	Optional body parameter

**Response:** If the authentication request is successful, the response will be a simple string with the current JSESSION ID. For example:

```
2E9B92D609824BB7D5CC566399B2FAF6
```
